

Albin Dana

Gender: Male Date of birth: 04/09/2002 Nationality: Albanian

Home: Rr. Fehmi Lladrovci, nr. 93, 20000, Prizren, Kosovo Email: albindana3@gmail.com Phone: (+383) 044-961-910

LinkedIn: <https://www.linkedin.com/in/albin-dana-374812292/> GitHub: <https://www.github.com/albindana>

EDUCATION AND TRAINING

[2021 - Current] Computer Science and Software Engineering

UBT College

City: Prizren | Country: Kosovo | EQF level 6

[2018 - 2021] Gymnasium "Gjon Buzuku"

City: Prizren | Country: Kosovo

[2009 - 2018] SHFMU "Mati Logoreci"

City: Prizren | Country: Kosovo

TRAINING & FELLOWSHIP

[Aug 2025 - Jun 2026] AI Engineering Fellow

LIFE from Gjirafa — Leadership Institute of Future Engineers | 11-month intensive fellowship | life.gjirafa.com

An intensive, industry-led program covering backend, frontend, DevOps, and product management, built entirely on real infrastructure rather than mocked services, with a heavy backend focus and a final group capstone project (StackSift).

- Built production-style ASP.NET Core APIs using Clean Architecture, JWT authentication with refresh tokens, Keycloak (OAuth2/OIDC), and role-based access control.
- Worked with PostgreSQL, EF Core, Dapper, MongoDB, and Redis (caching & pub/sub), including query optimization with EXPLAIN ANALYZE and indexing strategies.
- Implemented real-time features with SignalR (Redis backplane) and asynchronous, message-driven systems with RabbitMQ and Kafka.
- Practiced DevOps end-to-end: Docker & Docker Compose, Kubernetes with Helm, CI/CD pipelines (GitHub Actions / Azure DevOps), Terraform, and monitoring with Prometheus & Grafana.
- Applied backend testing practices: xUnit, Moq, Testcontainers, and WebApplicationFactory integration testing.
- Gained cross-functional exposure to frontend (React, Next.js, TypeScript, TanStack Query) and product management (sprint planning, user stories, A/B testing, product analytics) through team-based project work.

WORK EXPERIENCE

[2023 - 2025] Freelance Web Developer

Freelance | Built custom WordPress websites for clients, handling theme setup and customization using HTML, CSS, and basic JavaScript.

[2017 - 2020] Sales Assistant & Cashier

General Store | Part-time | Handled customer sales and operated the cash register, managing transactions, basic stock organization, and day-to-day customer service.

LANGUAGE SKILLS

Mother tongue(s): Albanian

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

	LISTENING	READING	WRITING	SPOKEN PRODUCTION	SPOKEN INTERACTION
--	-----------	---------	---------	-------------------	--------------------

English (B2)	B2	B2	B1	B1	B2
Turkish (B2)	B2	B2	B2	B2	B2

PROJECTS

StackSift — AI-Powered SRE & Log-Analysis Platform

Team Capstone Project (3 members) | Role: Backend Lead | Private repository

A multi-tenant SaaS platform for log analysis and incident alerting, built with .NET 10 Clean Architecture and CQRS. As Backend Lead, implemented real-time alerting with SignalR (Redis backplane), asynchronous log processing with RabbitMQ/MassTransit, and an AI/RAG pipeline for incident analysis.

Technologies: .NET 10, PostgreSQL, Redis, RabbitMQ/MassTransit, SignalR, Elasticsearch, Hangfire, Docker, Kubernetes, Helm

E-Commerce Order System (N-Tier Monolith)

Personal Project | github.com/Albindana/E-Commerce-Order-System

A B2C order management API built with ASP.NET Core 8 using a strict N-tier architecture, JWT authentication with refresh tokens, and the Repository/Unit of Work patterns for testability. Covered with 33 integration tests and full unit test coverage using Moq.

Technologies: ASP.NET Core 8, EF Core 8, JWT, Identity, FluentValidation, Mapperly, xUnit, Moq, Swagger

Real-Time Order Tracking Dashboard

Personal Project | github.com/Albindana/Real-Time-Order-Tracking-Dashboard

A full-stack dashboard where order updates push live to a React client over a SignalR WebSocket connection, with Redis pub/sub decoupling the broadcast from the HTTP request lifecycle. Containerized the full stack with Docker Compose.

Technologies: ASP.NET Core 8, SignalR, Redis, EF Core, React, TypeScript, Tailwind CSS, Docker

Notification & Messaging Platform (Microservices)

Personal Project | github.com/Albindana/Notifications-microservices

An event-driven notification platform split into three independently deployable ASP.NET Core services, each owning its own database, using an Ocelot API gateway and RabbitMQ/MassTransit for async events. Built a React + TypeScript dashboard to demo the platform end-to-end.

Technologies: ASP.NET Core, RabbitMQ, MassTransit, Ocelot, MediatR (CQRS), EF Core, React, TypeScript, Docker

SKILLS

Core Backend: C# | ASP.NET Core | RESTful APIs | EF Core (migrations) | JWT Authentication & ASP.NET Identity | CQRS / MediatR | FluentValidation | xUnit & Moq (testing)

Core Frontend: JavaScript | HTML5 | CSS3 | React | TypeScript | Tailwind CSS

Tools & DevOps: Git/GitHub | Docker & Docker Compose | Postman (API testing) | Swagger | VS Code | Cursor AI | Claude Code | Trello

Also Familiar With: PHP | SQL (MySQL) | Java | Node JS, Express JS (entry level) | Redis (caching & pub/sub) | SignalR | RabbitMQ / MassTransit | Microservices architecture (entry level, applied in team and personal projects)

Architecture & Practices: N-Tier / Clean Architecture, MVC, OOP — applied across personal and team projects

JOB-RELATED SKILLS

- Strong analytical skills with a focus on solving complex problems in web development.
- Fast learner and adaptable to new environments.
- Passionate about technology and continuous learning, with a focus on backend development.

COMMUNICATION SKILLS

- Effective communicator with experience collaborating with colleagues to develop web solutions.

OTHER SKILLS

- Strong mathematical skills with a focus on logic, algebra, and problem-solving.
- Skilled chess player, demonstrating strong strategic thinking and problem-solving abilities.
- Love playing and watching football — a fun way to stay active, enjoy teamwork, and keep up with a game I'm passionate about.
